

# Mileage Tracker App Planning

Outline: an app that is used to track the mileage of work trips. This information can be stored and then used to get tax back at the end of the tax year.

Laws: the app must hold at least 3 months of all trips in the previous 12 months as proof.

Features:

- must be able to categorise the trips into personal/work/consulting/seminar/create your own
- app connects to google maps for directions
- personal log ins to store this information
- you can input your odometer
- add notes against trips
- export trip statements into pdf, csv, xlsx
- time stamps, date and kilometres travelled
- reminders for rego, insurance and wof
- link to fuel account
- a way to scan in fuel receipts
