

Google Semantic Location History

A guide to exporting a JSON file containing your semantic location history.

1. Log into your Google account
2. Follow this link: <https://takeout.google.com/settings/takeout?pli=1>

3. Click “Deselect all” in blue at the top right of the ‘Create A New Export’ section
4. Locate and select “Location History (Timeline)”. The default will be a JSON file, but you can check this by clicking the “multiple formats” box

5. Scroll down and click ‘next step’
6. Check the default selections below and click ‘Create Export’

2

Choose file type, frequency & destination

Destination

Transfer to:

Send download link via email

When your files are ready, you'll get an email with a download link. You'll have one week to download your files. [Learn more](#) about how to locate, access, and share your data.

Frequency

☒ Export once

1 export

☐ Export every 2 months for 1 year

6 exports

File type & size

File type:

.zip

Zip files can be opened on almost any computer.

File size:

2 GB

Exports larger than this size will be split into multiple files.

Create export

7. The export will show in your email to download to your preferred location. This can take hours or possibly days.
8. Upload your JSON file to via the box above
